

THRIFTY WATTS® PROGRAM SIGN-UP SHEET

Yes, I am a Moorhead Public Service residential electric customer* and would like to participate in the Thrifty Watts® Program at the level I have selected below. I understand that a service person from Grace Electric, working on behalf of Moorhead Public Service (MPS), will install control equipment on the exterior of my home.

☐ **Central Air Conditioner Only**

Monthly credit of \$5.50 per month** for May through September.

The central air conditioner will be cycled by MPS for approximately 12 minutes on and 12 minutes off.

☐ **Central Air Conditioner and Electric Water Heater**

A monthly credit of \$8.50 per month** for May through September, and a monthly credit of \$3.00 per month** for October through April.

The water heater option may not be available if the equipment location or building construction makes it difficult or impossible to connect the required wires.

**Please note that renters, dual-fuel customers, and customers with heat pumps, window air conditioners, or mini-split systems are not eligible to participate in the Thrifty Watts® Program.*

****A credit to your account will appear on your next monthly billing cycle after the electrical contractor has installed your Thrifty Watts controller and an MPS service person has completed the final inspection and programmed the controller.**

If, at any time, you decide that you no longer want to be on the program, please call 218.477.8000, Option 4, and we will disconnect the equipment at no cost to you.
